On-card Full Width
Flat Grinder

The Indian Card Clothing Company Limited
Preferred Partner To The Global Textile Industry

Consistent card performance demands for a perfectly-ground and maintained Flat Tops. Invariably, during working of a card, flat tops goes through frequent wear and tear; hence to ensure the carding efficiency, maintenance of Tops wire points is imperative. Off-card flat top grinding requires the top to be removed from the card and this causes machine stoppage and production interference.

To address this issue, ICC has developed an "On-card Full Width Flat Grinder", covered with Emery fillet with special abrasive granules assisting the line in managing a burr-free grinding effect of Flat Tops wire points.

2D Schematic Diagram of an On-card Full Width Flat Grinder

Features & Value proposition

Compatibility

Available for 40 inch and 60 inch wide card.

Ease of use

Can be installed easily on card

Efficiency

Can be used on the card without removing flats from the machine

Precision

Precise grinding of Tops wire tips with fine grade abrasive fillet

About Us

The Indian Card Clothing Co. Ltd has been an innovator in carding solutions since its inception in 1955. At ICC, with over 7 decades of industry experience we understand what exactly matters to you and your customers. We also understand that the quality of your product depends on the quality of our products. To address this and to meet the growing needs of the textile industry, ICC has invested in 2 state-of-the-art manufacturing facilities in Pune and Nalagarh in Himachal Pradesh.

With a comprehensive global reach physically and through partners, best-in-class human capital; cutting-edge global manufacturing standards and high quality card clothing products, we, at ICC strive to exceed all the needs and demands of our customers on-time...always.
