

Card Room Service Machines

ARM 08

For mounting all types of rollers

The All Roller Mounting Machine - ARM 08, is the result of years of experience in manufacturing and mounting of card clothing. With state-of-the-art features and user friendly design, ARM 08 makes perfect mounting of wires easy and effortless.

Features

- Suitable for on-machine mounting of all rollers up to 1600 mm length.
- Stepless variable speed drive with AC inverter and remote control.
- On-machine checking attachment of rollers after mounting is provided.
- Suitable for mounting of Beater Rollers, Lickerin Rollers, Feed Rollers, Stripper Rollers, Feed Rollers, Cleaning Rollers and other organs of the carding machine.

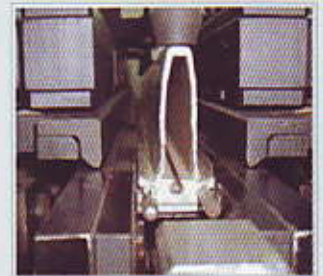

CLIPIT 4060

Accurate clipping of Tops

Automatic Flat Clipping Machine 'CLIPIT 4060' ensures accurate clipping of Tops on the bare flats with unique single stroke side action.

Features

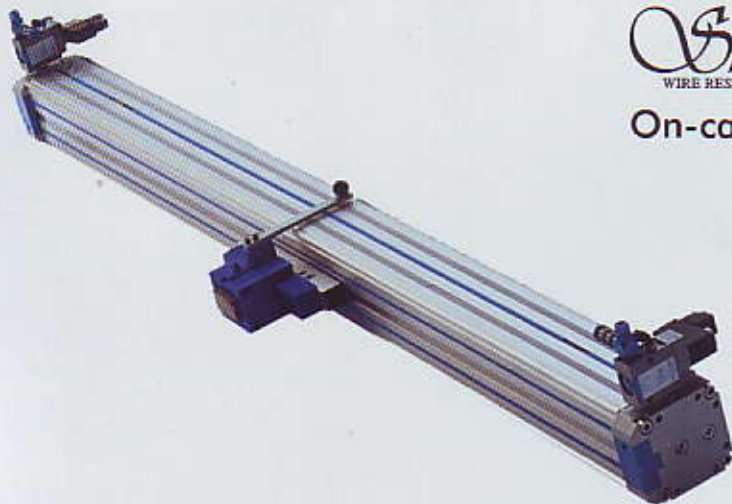

- Suitable for Aluminium or Cast iron flat of 40" and/or 60" width.
- Precision in clipping achieved through pneumatic pressure applied on the flats during the entire clipping process.
- Quick clipping of the entire length of the flat achieved in a single movement without bending or forming rollers being used. No manual work required.
- Superior grip of the tops on the bare flats achieved by process of clipping from the side.
- Automatic electronic controls.

Sharprite

WIRE RESHARPENING DEVICE

On-card Re-sharpening device for metallic wires

Modern carding machines require metallic wire with finer blade thickness, lesser tooth height and "Cut to Point" geometry. These wires need proper maintenance for consistency and optimum carding action at high speed. Sharprite Wire Resharpening Device provides the perfect solution.

Features

- Traverse speed of the stone is adjusted to the cylinder rotation speed. This ensures that all the wire points get a gentle resharpening.
- The abrasion of card clothing is minimised allowing more number of resharpening.
- Works with compressed air, has no gear box, belt drive or complicated electronic system.
- Easy to handle and maintain.
- Suitable brackets are provided for different models of cards.

Sharprite-Tops

Cleaning and re-sharpening of tops

Proper maintenance of tops is equally critical for consistent performance of the card. Carding action causes wear of the wire tips which need periodic grinding. Often the tops get loaded with impurities. Tops require both grinding and cleaning at regular intervals for optimum performance. Sharprite Tops has been developed to perform both these functions.

Features

- No machine down time as the device works on the card.
- Allows frequent resharpening of wire points, retains the original shape of the wires.
- Removes impurities loaded on the tops and thoroughly cleans wire points.
- Eliminates need for extra man-hours for manual cleaning of tops

HEAD OFFICE & FACTORY

Mumbai-Pune Road, Pimpri, Pune - 411018, INDIA
Tel: +91 20 39858200 (Operator)
Direct : (20) 39858234 (Domestic)
+91 20 39858235 (Export),
Fax: +91 20 39858300
